## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. With respect to independent claim 1, prior art fails to disclose a time-of-flight (TOF) system integrated onto a single chip for measuring precise time intervals, the system comprising: a first constant fraction discriminator for receiving an analog start signal input and providing a digital output representative of the start signal; a second constant fraction discriminator for receiving an analog stop signal input and providing a digital output representative of the stop signal; a logic circuit coupled with the first and second constant fraction discriminators for determining a time interval between the start and stop signals; and a time-to-digital converter (TDC) receiving as input the time interval signal between the start and stop signals, the time-to-digital converter for digitizing the time interval with reference to an off-chip precise reference clock.

Claims 2-11 are allowed by virtue of their dependencies on the independent claim 1.

### **Conclusion**

4. Green discloses (US 2005/0061968 A1) a method of determining the arrival time of one or more ions at an ion detector of a time-of-flight mass spectrometer using a digital-to-time converter.
